1. STORY AND OBJECTIVE OF THE GAME

STORY: Our protagonist, "Archaeologist Helios," accidentally breaks the "Seal of Chronos" while excavating an ancient temple known to be forbidden. When the seal is broken, time warps, and Helios finds himself trapped in an ancient arena teeming with mythological monsters. The spirit guardian of the temple offers Helios only one way out: "Defeat the champions of all eras in the arena and repair the seal."

OBJECTIVE OF THE GAME: The player controls the character Helios and tries to survive against waves of ancient monsters coming at him. The goal is to survive for a certain amount of time in each room (or arena), defeat the Boss at the end of the room to advance to the next era, and ultimately lift the curse to return to the present day.

2.MOVEMENT MECHANICS

Movement is fluid and focused on strategic positioning to avoid being swarmed by enemy hordes.

- **Controls:** 360-degree movement using arrow keys or WASD.
- **Base Speed:** The character moves at a default speed of 4 units per second.
- **Zip/Dash:** Helios can perform a quick "zip" movement across 2 units to evade traps or enemy clusters.
- The keybinds can be changed in game settings.

3. COMBAT AND ATTACK MECHANICS

- The player performs the basic weapon attack (Sword/Spear) with the **Left Mouse Button**.
- To use the character's special abilities, the player must press the **Q - W - E - R** keys.

- Attacks are directed towards the direction the character is facing (Up, Down, Right, Left).
- To prevent "spamming" (continuous key pressing), each special attack costs **20 Mana** (Starting mana is 100).
- There is a **0.5-second** cooldown between basic attack hits.

Power-up Mechanic: When the Boss at the end of each level is defeated, the Boss's spirit is absorbed, and a permanent power-up is added to the character's stats.

Character Damage Profile:

- **Basic Attack (Sword/Spear):** Deals **10 Damage** per hit.
- **Air Thrust (Default):** Deals **15 Damage** and provides tactical knockback.
- **Fire (W):** Impact deals **25 Damage**, followed by an area-of-effect (AoE) burning that deals **5 Damage/second** for 6 seconds.
- **Strength Potion (Buff):** Increases all damage output by **100% (x2 multiplier)** for 10 seconds.

Mana Regeneration System:

- Maximum Mana: 100.
- Mana regenerates passively at a rate of 5 Mana per second when the player is not casting abilities.
- Defeating an enemy restores 10 Mana.
- Boss enemies do not drop Mana to prevent ability spamming during boss fights.

4.CHARACTER ABILITIES

Helios gains powers by absorbing the spirits of defeated champions.

- **Air Thrust (Default):** Targets an enemy and pushes them back while knocking Helios back by 2 units for repositioning.

- **Earth [Mummy Vault] (Q):** Creates a protective shield that evades 4 incoming attacks. While active, movement speed is reduced to 2 units/sec, and the zip ability is disabled.

Fire (W): Launches a projectile that creates a 4-unit diameter fire zone lasting 6 seconds. Caution: Helios takes damage if he enters the flames.

- **Water [Valhalla Peace] (E):** Creates a healing aura that refills health bars until full. While active, offensive damage dealt is halved for 7 seconds.

5.DIALOGUE SYSTEM

Environmental storytelling and narrative progression are facilitated through text-based interaction.

- **Interaction:** Pressing the "T" key allows Helios to interact with objects and non-hostile spirits.
- **Clue Gathering:** Conversations provide clues regarding the origins of the time rift and the location of the final boss.

6.HEALTH (HP) SYSTEM

- **Health Bars:** Helios starts with 5 health bars.
- **Regeneration:** If health drops below 2 bars, Helios regenerates 1 bar every second if no damage is taken for 5 seconds.
- **Pickups:** Players can find health-restoring items inside breakable pottery (Amphorae) scattered throughout the arena.

7.TIME SYSTEM

- There is a counter in each arena room. The reward changes based on how fast you clear the room:
  - o **Gold Chest:** Under 2 minutes. o
  - **Silver Chest:** Under 3 minutes. o
  - **Bronze Chest:** Under 5 minutes.

- After the Boss is killed, a countdown starts for the portal to close (60 seconds). If the player does not reach the portal within this time, they are trapped in that room and die.

Difficulty-Based Time Pressure:

- **Easy:** No additional time penalties.
- **Normal:** Enemy spawn rate increases after 3 minutes.
- **Hard:** Environmental hazards activate after 3 minutes.
- **Mythic:** Continuous enemy spawning begins after 2 minutes.

8. BOSS BATTLES

Each era features a unique Champion boss with 3 primary abilities. Bosses utilize a "Stone-to-Flesh" transition, starting as immobile bronze or marble statues and becoming full-color combatants upon activation.

Stone-to-Flesh Phase Rules:

- During the Stone-to-Flesh transition, bosses are invulnerable and cannot receive damage.
- The transition lasts 3 seconds and serves as a visual and audio cue for the upcoming fight.
- Boss combat begins only after the transformation is fully completed.

8.1. CHARACTER DAMAGE PROFILE

To balance boss encounters, Helios's combat effectiveness is defined as follows:

- **Basic Attack (Sword/Spear):** Deals **10 Damage** per hit[5].

- **Attack Speed:** 0.5-second cooldown between hits[6].
- **Air Thrust (Default):** Deals **15 Damage** and provides tactical knockback[7].
- **Fire (W):** Impact deals **25 Damage**, followed by an area-of-effect (AoE) burning that deals **5 Damage/second** for 6 seconds[88].
- **Strength Potion (Buff):** Increases all damage output by **100% (x2 multiplier)** for 10 seconds[9].

8.2. BOSS COMBAT STATISTICS & STRATEGIES

Each boss encounter is balanced against Helios's base stats and requires specific elemental counters.

Difficulty Level	HP Multiplier	Example Boss HP	Hits to Kill (Basic)
Easy	x0.8	160 HP	16 Hits
Normal	x1.0	200 HP	20 Hits
Hard	x1.5	300 HP	30 Hits
Mythic	x2.5	500 HP	50 Hits

Boss-Specific Strategies:

- **Scandinavian Champion:** Use **Water [Valhalla Peace] (E)** to extinguish "Hellfire Breath" for a 3-second stun[10101010]. Best killed by pushing the boss into environmental hazards using **Air Thrust**[11].
- **Greek Champion:** Use **Earth [Mummy Vault] (Q)** to block "Lightning Balls"[121212]. Attack only when the **Reflective Aura** is inactive to avoid self-damage[13].
- **Egyptian Champion:** Cast **Fire (W)** to disrupt "Tornadoes"[14141414]. Utilize **Zip** to avoid floor spikes and projectile-reflecting shields in narrow corridors

Boss Defeat Conditions:

- Bosses are defeated when their HP reaches zero.

- Upon defeat, the boss spirit is absorbed by Helios.
- A permanent stat upgrade is granted.
- A 60-second countdown starts before the portal closes.

9. ENEMIES

Enemy Scaling:

- Enemy health and damage increase by 10% every 5 minutes in survival modes.
- Elite enemies begin spawning after the second arena.

Hordes are themed based on the current temporal map:

- **Egypt: Mummies and desert spirits.**

- **Scandinavian: Ice Giants and wolves.**

Greek: Satyrs, Harpies, and fallen legionaries.

10.SAVE AND DEATH (CHECKPOINT) SYSTEM

Checkpoints are represented by unlit sacrificial torches found during exploration.

- **Activation:** Pressing the "T" key lights a torch, setting it as the current resurrection point.

Scaling: The frequency of torches decreases as the difficulty increases.

11.GAME MODES

1. **SURVIVE (Single Player):**

- The player tries to survive as long as possible without dying.
- Enemies get stronger every 5 minutes.
- No saving. If you die, you start from the beginning (Roguelike).

2. **CO-OP SURVIVE (Two Players):**

- You stand against waves with a friend.
- If your friend dies, you have 10 seconds to revive them when the enemy wave ends. If you fail, the game ends or you continue alone.

- In Co-Op mode, boss HP is increased by 50% to compensate for the second player.
- Boss damage values remain unchanged.
- Enemy spawn count is increased by 30% during co-op sessions.

3. RANDOM MODE (Trust Your Luck):

- You start the game with a random weapon and a random ability (e.g., only a stick and teleport ability).
- Enemies also spawn randomly.

12.KEY MOMENTS

- **First 5 Minutes:** Player learns movement and combat basics while surviving early enemy waves
- **First Boss Fight:** Introduction of elemental counters and statue-to-life transformation
- **First Death:** Reinforces roguelike structure and learning through failure
- **Late Game:** Mastery of abilities and multi-era boss encounters
- **Tutorial System:** The first arena functions as a soft tutorial. Movement, basic attacks, and one ability are introduced sequentially through enemy waves and on-screen prompts.

13. DIFFICULTY LEVELS

- **Easy:** Enemy damage is 1 point. There are 3 checkpoints (torches) on the map.
- **Normal:** Enemy damage is 1.5 points. There are 2 checkpoints on the map.
- **Hard:** Enemy damage is 2 points. There is 1 checkpoint on the map.
- **Mythic:** Enemy damage is 3 points. NO checkpoints (Game Over if you die).

Difficulty Level	HP Multiplier	Scandinavian Boss HP	Hits to Kill (Basic Attack)
Easy [5]	x0.8	160 HP	16 Hits
Normal [6]	x1.0	200 HP	20 Hits
Hard [7]	x1.5	300 HP	30 Hits
Mythic [8]	x2.5	500 HP	50 Hits

14. MARKETING AND SHOP SYSTEM

Players can buy cosmetics with "Ancient Coins" (AC) collected in-game or with real money.

ITEMS:

- **Hats:** Spartan Helmet, Pharaoh Crown, Viking Horn. (150 AC each)
- **Weapon Skins:** Golden Sword, Bone Staff, Laser Spear. (200 AC each)
- **Outfits:** Gladiator Armor, Priest Robes. (250 AC each)

POTIONS (With In-Game Gold):

- **Health Potion:** 50 Gold (Fully restores health).
- **Speed Potion:** 50 Gold (Increases speed for 10 seconds).
- **Strength Potion:** 75 Gold (Double damage for 10 seconds).

BOX SYSTEM (Lootbox):

- **Bronze Chest:** 15% chance to drop a rare item.
- **Gold Chest:** 50% chance to drop a rare item.

15.TARGET AUDIENCE

- Age Range: 16-30
- Player Type: Casual to mid-core action players
- Appeal: Fast-paced combat, mythology-themed enemies, replayability
- Comparable Games: Hades, Vampire Survivors, Curse of the Dead Gods
- Target Rating: PEGI 12 / ESRB T

16.SPECIAL EVENTS, FESTIVALS & DAILY REWARDS

Instead of standard holidays, "Seasonal Festivals" that fit the mythological atmosphere of the game will be organized.

WINTER SOLSTICE: "SATURNALIA FESTIVAL" (New Year Period)

- *Concept:* The famous winter festival of Ancient Rome.
- **Special Costume: "Lord of Time"** (Chronos-themed armor made of clock gears).
- **Event:** Enemies may drop gift boxes instead of loot, containing extra gold.
- **Campaign: 20% Bonus** on all Ancient Coin purchases for 3 days.

SUMMER EQUINOX: "RISE OF RA" (Summer Period)

- *Concept:* The time when the Egyptian Sun God is most powerful.
- **Special Costume: "Son of the Sun"** (Gold-plated armor with glowing pauldrons).
- **Special Weapon: "Scorpion Staff"** (Emits sand effects when shooting).
- **Campaign: 40% Discount** on Fire Element items for 1 week at the start of summer.

MUSEUM WEEK: "LOST TREASURES" (Original Event)

- *Concept:* A tribute to history, fitting our Archaeologist protagonist.
- **Special Costume: "Classic Archaeologist"** (Fedora hat, leather jacket, whip style).
- **Event:** Hidden "Artifacts" appear in levels. Players who collect them gain extra XP.
- **Campaign:** Discount on Exploration and Loot-focused items (Speed potion, Luck potion).

DAY OF THE DEAD: "GATES OF HADES" (Halloween Period)

- *Concept:* The gates of the Underworld are slightly ajar.
- **Special Costume: "Ghost Gladiator"** (Semi-transparent, blue glowing body).

- **Map Change:** All maps become darker, and "Skulls" are scattered around instead of pumpkins.
- **Campaign: 30% Discount** on dark-themed costumes.

BLACK FRIDAY: "HERMES' MARKETPLACE"

- *Concept:* Hermes, the God of Trade, offers a deal to mortals.
- **Campaign: 50% DISCOUNT ON EVERYTHING** in the shop. Lasts for only 24 hours.

DAILY LOGIN REWARDS (LOYALTY SYSTEM) A 7-day cycle to keep the player engaged:

1. **Day:** 100 Gold.
2. **Day:** 1 x Health Potion.
3. **Day:** 250 Gold.
4. **Day:** 1 x Resurrection Scroll (Continue from where you died).
5. **Day:** 500 Gold.
6. **Day:** Random "Spell Scroll".
7. **Day: 50 Ancient Coins** (Premium Currency) or a Rare Cosmetic Piece.

17. ART, SOUND AND MUSIC

Camera:
Top-down perspective.

Visual Style:
Stylized semi-realistic fantasy with area-specific color palettes and atmospheres.

Color Themes by Area:

- **Roman Theme:**
  Warm stone colors, beige and dark reds, emphasizing power and arena atmosphere.
- **Egyptian Theme:**
  Dominated by warm sand, beige, yellow, and soft orange tones. A hazy and dusty atmosphere is used to emphasize heat, mystery, and ancient ruins.
- **Greek Theme:**
  Mount Olympus peak during the day, under a volatile, stormy sky. Harsh, blinding sunlight pierces through dark clouds, creating deep, sharp shadows. The color palette highlights danger and instability through intense whites, storm greys, and burning electric gold energy.
- **Norse/Hell Theme:**
  Midnight tones contrasted with flowing rivers of molten lava. The environment blends a cold, mystical, and supernatural atmosphere with the intense heat of the underworld.

Sound and Music:

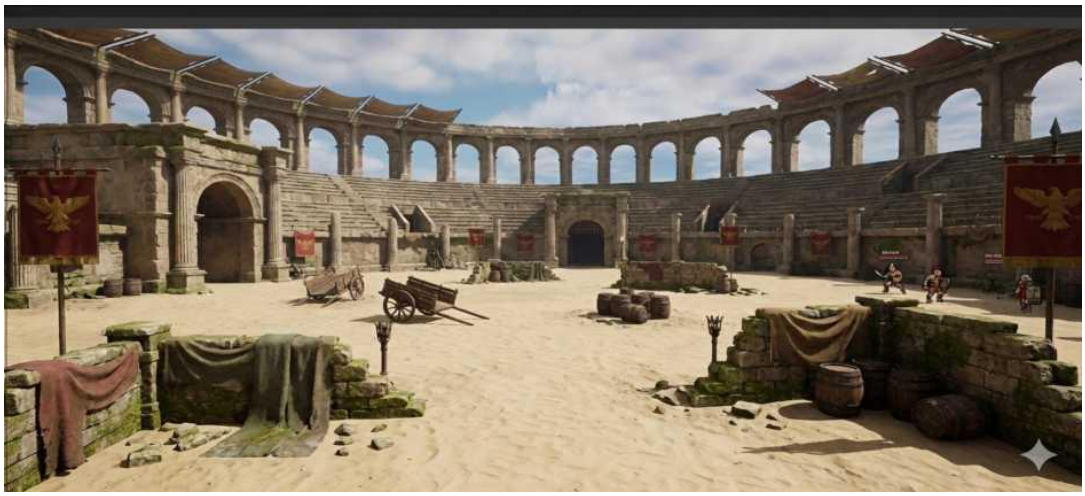
Each area features minimal but distinctive sound design to support immersion.

- **Roman Theme:**
  Heavy drums, crowd ambience, and metallic sounds to enhance tension.
- **Egyptian Theme:**
  Low ambient winds, subtle percussion, and distant echoes to reinforce isolation and mystery.

- **Greek Theme:**
  High altitude howling winds, deep sub bass thunder rolls, static electricity crackling, and an ominous, god-like presence.
- **Norse/Hell Theme:**
  Heavy bass rumbles rising from the deep underground, sticky crackling of melting lava, and a suffocating, dark tension.

18.MAPS

1. **COLOSSEUM (Roman Theme):** Open arena, few hiding spots, sandy ground.



2. **PYRAMID TOMBS (Egyptian Theme):** Narrow corridors, traps (spikes from the floor), dark environment.

3. **OLYMPUS PEAK (Greek Theme):** Platforms above clouds, danger of falling down.

4. **HELHEIM (Norse/Hell Theme):** Floor is full of lava, can only walk on stones, risk of burn damage.
